

Trailer Gap Fairing

Aerodynamic Profile Increases Fuel Efficiency

Features and Benefits

- Independently verified fuel savings of up to 2%
 - Multiple independent third party fuel tests including a U.S. DOE-sponsored SAE/TMC J1321 testing procedure conducted at the TRC test track
 - Reduction in fuel consumption increases to 6% overall when combined with the belly fairing
- Technology recognized and highly rated by the EPA SmartWaySM Transport Partnership
- Designed for use with aerodynamic sleepers and day cabs
- Visibly demonstrates a company's commitment to improving the environment and reducing harmful emissions
- Compatible design fits most dry van trailers
 - Installs in 2-3 man hours
 - Trailer face remains open to allow easy access to back of cab and line hook-ups
 - Unit weight = 75 lbs
- One year warranty
